

For last 20 years or so we have taken care that teachers within us must remain alive and should not get converted into a businessman. For this reason even if our results are comparable to national level our batch size is too small and educational values are too high.

This year due to performance of foundation students in board exams, in competitive for engineering and medical the parents and students are wishing to join safe hands and all our team decided not to get tempted and keep the batch size as it is.

But for better ness of parents and keeping our self away from temptation we are starting a batch by name "Help" this is not just to you but also to us.

This batch will be like distance learning program. Here we will provide study material which is not available in market. We will provide topic wise tests to students and mock tests he/she can appear along with students of foundation or at home. For outstanding performance the student will get chance to attain special coaching for junior science Olympiad classes during Diwali vacations, and if selected for "Homi Bhabha Bal Vaidyanic" examination level one the student will get admission to workshop for level two.

There will be one or two interaction session mostly on Sunday for dealing with problems of students.

We certainly know that due to this step the papers and our study material will be public and may be used by others we are ready to face the effects and are able to have different papers and material every year.

For this course also admissions will be limited, so you need to take your decision as soon as possible. Even students outside Akola can get the "HELP"

Help Course only for 9th Std----Rs.5000/- (One Time Non-refundable including ST)

Help Course only for 10th Std----Rs.5000/-(One Time Non-refundable including ST)

Help Course for 9th & 10th Std----Rs.8000/-(One Time Non-refundable including ST)
